## NEWS RELEASE

### OVER 500 VESSELS REALIZE THE BENEFITS OF FUELTRAX GLOBALLY

FUELTRAX® is now installed globally on over 500 vessels/fleets since its first-generation system launched in the market. The company monitors over 1,000 fuel consumers daily, providing data for improving performance and generating cost savings to a range of vessels – from small inland tugs to large oil tankers and a majority of today’s system operating aboard OSVs serving the offshore oil and gas market – FUELTRAX is establishing itself firmly as the market leader in the EFMS industry.

Anthony George, CEO and Founder, explains, “We say FUELTRAX is vessel agnostic — meaning it enhances fuel security, facilitates compliance, and optimizes performance on any vessel, with any fuel type, anywhere in the world.”

George continues, “Due to the caliber of technology that FUELTRAX employs, clients are seeing reductions in fuel costs across their operations. We only use the best technology in our system.” These improvements include:

- Our Coriolis mass flowmeter technology — the most accurate way to monitor fuel activity through direct measurements — is always tuned for unique vessel conditions.
- Dedicated Iridium® satellite communications provide pole-to-pole connectivity so the FUELTRAX system is ‘always on’ — collecting and transmitting fuel consumption and transfer measurements in real time.
- Every FUELTRAX system is pre-engineered to make installation straightforward, with minimal disruption to standard operations.”

Today, FUELTRAX also operates globally on over 200 vessels with its Generation 4 and 5 systems providing the crucial closed-loop and bidirectional communications. International Oil Companies continue to value the increased fuel efficiency and close accounting that are now essential to successful operations, and vessel owners rely on the FUELTRAX Data Delivery Guarantee to ensure critical offshore operations remain uninterrupted.

## NOTES TO EDITORS

About [FUELTRAX](#)

From its inception in 2006, FUELTRAX has grown to be the leading universal fuel management solution, compatible with any vessel, engine or fuel, in any location in the world. Together with its cloud-based data and analytics service, FUELNET, it provides fully self-contained, smart monitoring and measurement, reducing costs and setting the standard for secure, compliant, optimized vessel performance.

FUELTRAX is a product of Nautical Control Solutions, LP.
