NEWS RELEASE

FUELTRAX ADDS VIDEO SURVEILLANCE TO ITS SUITE OF FUEL MONITORING PRODUCTS

Integrated Video IP Surveillance (IVIS) is the latest expansion of remote monitoring and reporting technology from FUELTRAX.

FUELTRAX – the smart, self-contained, marine fuel management solution – protects assets and ensures security of fuel, compliance and optimized vessel performance.

With the launch of IVIS, all video surveillance collected by FUELTRAX is coupled with existing FUELTRAX fuel monitoring data and GPS tracking information. This deliver a complete picture of vessel operations and activities, updated every 15 minutes inside FUELNET.

The technology, which is built on the proven, robust, self-contained FUELTRAX communications infrastructure, is more reliable and easier to service than stand-alone CCTV surveillance systems.

Each FUELTRAX Integrated Video IP Surveillance system delivers:

- 360-degree coverage of vessel perimeter provided by four IP cameras.
- IP68 waterproof, automated grade steel cameras designed for marine environments.
- Up to 10 weeks of high-quality date/time-stamped video footage retained onboard.
- Daily updates to FUELNET with minute-by-minute snapshots from all four IP cameras.
- Power-interruption alerts and built-in backup power supply.
- All imagery date/time stamped, coupled with fuel and vessel location data.
- All components housed in a lockable cabinet with key.
- Option to install additional four cameras in exterior or interior locations.

FUELTRAX founder and CEO, Anthony George, says that IVIS enhances oversight of operations on board vessels anywhere in the world:

“By combining video surveillance data with smart fuel data, FUELTRAX Integrated Video IP Surveillance (IVIS) advances on standard CCTV applications with a complete and transparent view of vessel activities.”

Charterers & owners alike will benefit from the increased transparency to their onboard operations over standard CCTV applications. Footage can be reviewed and analysed online, where claims and incidences can be verified with other mission-critical data factors. Learn more about FUELTRAX with IVIS by visiting fueltrax.com.

NOTES TO EDITORS

About [FUELTRAX](#)

From its inception in 2006, FUELTRAX has grown to be the leading universal fuel management solution, compatible with any vessel, engine or fuel, in any location in the world. Together with its cloud-based data and analytics service, FUELNET, it provides fully self-contained, smart monitoring and measurement, reducing costs and setting the standard for secure, compliant, optimized vessel performance.

FUELTRAX is a product of Nautical Control Solutions, LP.
